 Data Anniversary (9)

Login Flow

Purpose: Validate anniversary celebration animations (confetti or fireworks) display correctly when users reach their account anniversary milestone. Animation type varies based on time of day.

Feature Flag:

1.EnableOwnerAnniversary = true

Testing Notes (Apply to All Test Cases):

- Test on BOTH light mode and dark mode
- Test on BOTH iOS and Android platforms
- Brands: NISSAN and INFINTI
- Regions: NNA and NCI
- Languages: English (EN) and French (FR) for NCI only

Trigger Conditions:

1. isAnniversary = true

2. Anniversary year: 1 to 5

3. Brand: NISSAN (NCI) or INFINITI (NCI)

4. User navigates to Home Page

Animation Logic:

Day Time (6:01 AM - 11:59 PM)

1. Display: Confetti animation

2. Plays: Once per Home Page visit

3. Repeats: Every time user returns to Home Page (within 48h window)

Night Time (12:00 AM - 6:00 AM)

1. Display: Fireworks animation

2. Plays: Loops 3 times

3. Repeats: Every time user returns to Home Page (within 48h window)

Business Rules:

1. Animation controlled by Settings page toggle

2. Anniversary celebration expires after 48 hours

3. Animation triggers every Home Page visit during active 48h period

4. Time-based animation selection (confetti vs fireworks)

Test Scope:

Brands:

1. NISSAN (NCI) - English and French (Canada)

2. INFINITI (NCI) - English and French (Canada)

Platforms:

1. iOS

2. Android

Mode Validation:

1. Light mode

2. Dark mode

Language Coverage:

1. English (EN)

2. French (FR) - NISSAN NCI and INFINITI NCI only

Charge History (13)

Home > Charge

THERE HAS BEEN AN UPDATE TO THIS FEATURE. PLEASE READ BELOW

<https://app.clickup.com/t/86b63902y>

<https://app.clickup.com/t/86b5h6t2g>

The Charge History screen has two tabs, All Charges and In-Network. These use different data sources and information to provide users with different sets of charge history data.

"All Sessions" retrieves information from the vehicle (VehicleChargeHistory API).

"In-Network" retrieves information related to NISSAN ENERGY Charge Network charges from the Nissan Store (Salesforce) system. This functions more like a receipt, and is available to the Primary Driver EV users (NissanPayOrderHistory API).

A toggle at the top of the page allows users to switch between these data sets.

The Charge History card and Charge History toggle are no longer dependent on any FF. The Charge History card should be shown to all users of any electric vehicle (exception - missing DRIVING_ANALYSIS (EV) or CHARGE_HISTORY (EV2) caps for AD). Tapping the card should navigate PD to the In-Network tab of the charge history screen, and there is no capability check before proceeding to the In-Network tab.

Please note All Sessions tab is displayed only if VehicleCapabilities returns DRIVING_ANALYSIS as "true" (EV) or CHARGE_HISTORY as "true" (EV2) (this additional CHARGE_HISTORY check was implemented because BE does not return DRIVING_ANALYSIS for EV2 and probably will be removed)

Case	Priority	Automation	Configurations	Created by	Case ID	Created at	Estimate	Folder	Forecas

 V1G - Vehicle-to-Grid (29)

Home > Charge

Context:

- V1G is Vehicle-to-Grid (Smart Charging)
- A user can enroll in the smart charging program to start getting personalized cost optimizations and smart charging recommendations from Nissan / their partners (BTR)
- FF "GrantV1G": {"enabled": true, "checkCapability": true}
- eVehicleEligibility > "v1GEligible": true
- Nis NNA and NCI only (EV and EV2)
- Primary Driver only

Statuses:

- **ACTIVE** Indicate the account in active state
- **INACTIVE** Indicate the customer has opted out of the V1G program. Not used.
- **CANCELLED** Indicate the account is deactivated. User has left the program.
- **NOT_ENROLLED** Indicate the account is not enrolled in the V1G program.
- **FAILED** Enrollment within the program has failed catastrophically.
- **CLOSED** Indicates that vehicles are no longer owned by the user
- **ENROLLING** Indicate that the vehicle is started enrolling and in progress

 Create (18)

Vehicle > Schedule Service

Purpose: Validate the Create Service Booking flow starting from entry points through completion. All test cases begin from the entry points that route to the `Select Services` screen with native booking support.

Flow Overview:

1. User enters from any entry point (Home hero, Vehicle screen, Maintenance card, etc.)
2. Routes to Find Dealer screen (if no preferred dealer) or directly to Select Services (if preferred dealer set)
3. Select Services screen displays with available services for selected dealer
4. User selects services and proceeds through booking workflow
5. Validates `nativeServiceBooking= true` at all stages

Entry Points That Start Create Flow:

With Preferred Dealer Set:

- Home Screen (Hero) - Schedule Service CTA
- Vehicle Screen - Quick Actions Schedule Service Button
- Vehicle Screen - Maintenance Schedule Card → Schedule Now
- Vehicle Screen - MIL Status Card / Red Alert icon
- Maintenance Schedule Screen - Schedule Service CTA
- Recall/Service Campaign Screen - Schedule Service CTA
- MIL Detail Screen - Schedule Service CTA
- Support Screen - Quick Actions Schedule Service Button

Without Preferred Dealer (Routes through Find Dealer):

- Same entry points route to Find Dealer/Retailer screen for dealer selection first

Edit (6)

Vehicle > Schedule Service

Purpose: Validate the Edit SSB (Edit booked appointment) workflow. All test cases begin from the Upcoming Appointment card on Vehicle Screen or Service History Screen and cover editing scenarios for individual appointment details, navigation paths, and error handling.

Related Ticket: [\[iOS\]\[Edit SSB\] Edit booked appointment navigation and flow](#)

Flow Overview:

1. User taps Upcoming Appointment card on Vehicle Screen or Service History Screen

2. Appointment Details card is displayed showing current booking information

3. User can tap Edit on one of four cards:

• Selected Services card - Routes to Select Services screen

• Appointment Details card - Routes to Select Date & Time screen

• Transportation card - Routes to Select Date & Time screen

• Contact Information card - Routes to Contact Information screen

User makes modifications on the edit screen Back button returns to Upcoming Appointment card (entry point) with exit confirmation - does NOT navigate backwards through the edit flow User saves changes via EditServiceAppointment mutation or deletes appointment via CancelServiceAppointment mutation

Edit Entry Routes:

• **Edit Selected Services:** Tap Edit on Selected Services card → Routes to Select Services screen (dealer locked, services NOT prepopulated, contact info prepopulated)

• **Edit Appointment Details/Transportation:** Tap Edit on Appointment Details or Transportation card → Routes to Select Date & Time screen (date/time NOT prepopulated for safety, contact info prepopulated)

• **Edit Contact Information:** Tap Edit on Contact Information card → Routes to Contact Information screen (email/phone prepopulated)

Critical Requirements:

• Back button from ANY edit screen shows exit confirmation modal and returns to Upcoming Appointment card - does NOT navigate backwards through edit screens

• Contact Information IS prepopulated in all edit flows (email, phone)

• Vehicle Mileage, Tell Us More, and Optional Preferences are NOT prepopulated when editing services or date/time

• Date/Time NOT prepopulated when editing appointment details (critical safety feature - prevents accidental rebooking)

• Services NOT prepopulated when editing selected services

• Dealer card is locked during service edit (cannot be changed)

• Close (X) button shows unsaved changes warning from all edit screens

• Bottom navigation bypasses warning and abandons edit session

• EditServiceAppointment mutation saves changes with success toast

• CancelServiceAppointment mutation deletes appointment (must be called exactly once, not multiple times)

• Only editable appointments (isEditable: true) support Edit functionality

Case	Priority	Automation	Configurations	Created by	Case ID	Created at	Estimate	Folder	Forecast
Upcoming Appointment - Details - Editable	Critical	No		User	62132	12/09/2025 3:51 pm		Edit	
Edit Schedule Service - Edit Entry Points & Redirection	Critical	No		User	62135	12/11/2025 1:08 pm		Edit	
Edit Schedule Service - Navigation Controls	Critical	No		User	62136	12/11/2025 1:31 pm		Edit	
Edit Service Appointment - Save Changes - Success	Critical	No		User	62137	12/11/2025 2:29 pm		Edit	

 Edit Service Appointment - Save Changes - Failure	 Critical	 No		 User	 62138	 12/11/2025 2:43 pm		 Edit	
 Upcoming Appointment - Details - Non-Editable	 Critical	 Yes	Android, Prod • Prod, iOS	 User	 907	 08/04/2023 9:55 am		 Edit	 58.2

 Delete (3)

Vehicle > Schedule Service

Purpose: Validate Delete Service Request workflow from entry points through completion

Flow Overview:

- User can access delete from two entry points:
 - Upcoming Appointment Screen:** Tap DELETE SERVICE REQUEST button directly (before entering edit flow)
 - During Edit Flow:** Tap DELETE SERVICE REQUEST button on Upcoming Appointment screen after making changes
- Confirmation modal is displayed
- User confirms deletion via CancelServiceAppointment mutation
- Appointment is permanently deleted
- User is redirected to Vehicle Screen

Delete Entry Points:

- From Upcoming Appointment (Direct):** No changes made, delete appointment immediately
- From Upcoming Appointment (During Edit):** Changes made but not saved, delete appointment and discard changes

Critical Requirements:

- CancelServiceAppointment mutation deletes appointment exactly once (not multiple times)
- Confirmation modal must be shown before deletion
- Success toast appears after successful deletion
- User redirected to Vehicle Screen after deletion
- Only editable appointments (isEditable: true) support Delete

Case	Priority	Automation	Configurations	Created by	Case ID	Created at	Estimate	Folder	Forecas

Second Delivery - Discovery & CTA Display (10)

Vehicle > Second Delivery

Feature: MyINFINITI Expert (INFINITI Only)

Note: Nissan no longer supports this feature. INFINITI only.

Purpose: Validate discovery and CTA display logic for MyINFINITI Expert virtual appointments. Tests when booking options and marketing messages appear based on eligibility and timing conditions.

Test Scope:

- Eligibility determination via SecondDeliveryEligibility query
- CTA card display on Home and Vehicle screens
- Prioritized state (first 30 days)
- Marketing pop-up display and behavior

 Second Delivery - Entry Points (3)

Vehicle » Second Delivery

Second Delivery - Entry Points

Purpose: Validates all entry points and discovery mechanisms for accessing Second Delivery feature across the app. Tests where and how users discover, access, and navigate to the Second Delivery program.

Scope: Entry point validation, navigation flows, CTA taps, and feature discoverability.

Feature Overview

- **Feature Name:** MyINFINITI Expert (Second Delivery)
- **Brand Support:** INFINITI ONLY (Nissan NOT supported)
- **Appointment Type:** Virtual Appointments ONLY (no in-person or dealership options)
- **Duration:** 1-hour virtual meeting with INFINITI product and technology expert

Entry Points

Users can access Second Delivery feature through:

- **Home Screen - Second Delivery Card:** User taps Second Delivery Card on Home screen to navigate to virtual booking
- **Vehicle Screen - Second Delivery Card:** User taps Second Delivery Card on Vehicle screen to navigate to virtual booking
- **Marketing Pop-up - BOOK NOW:** User taps BOOK NOW button in marketing pop-up to navigate to virtual booking

Key Requirements

- Virtual-only appointments (no hybrid or in-person)
- INFINITI brand exclusively (Nissan excluded)
- All entry points must route to `SecondDeliveryAppointmentsAtVirtual` (virtual only)
- Navigation must route to virtual appointment booking flow only
- NO appointment type selection (virtual is forced)

Mock Data Reference

Eligibility Mock: `SecondDeliveryEligibilityResponseRDRRecordFound`

Virtual Appointment Mock: `SecondDeliveryAppointmentsAtVirtual`

Booked Appointment Mock: `SecondDeliveryEligibilityResponseAppointmentBooked`

Critical Notes

- INFINITI brand only - test with Infiniti vehicles (QX80, Q60, etc.)
- Nissan vehicles should NOT show Second Delivery feature
- Feature Flag: `EnableSecondDelivery` must be set to `true`
- All entry points lead to same virtual booking flow

Case	Priority	Automation	Configurations	Created by	Case ID	Created at	Estimate	Folder	Forecas
 Second Delivery - Home Screen - Card	 Critical	 No		 User	 62229	 12/19/2025 2:58 pm		 Second Delivery - Entry Points	
 Second Delivery - Vehicle Screen - Card	 Critical	 No		 User	 62230	 12/19/2025 2:58 pm		 Second Delivery - Entry Points	
 Second Delivery - Marketing Pop-up - Book Now	 Critical	 No		 User	 62231	 12/19/2025 2:58 pm		 Second Delivery - Entry Points	

 **Second Delivery - Booking (Virtual)** (8)

[Vehicle](#) > [Second Delivery](#)

Second Delivery - Booking (Virtual)

Purpose: Validates the virtual appointment booking flow for Second Delivery. Tests the complete booking process from Select Date and Time screen through appointment confirmation.

Scope: Date/time selection, availability validation, contact information, special instructions, booking review, and confirmation.

Feature Overview

- Feature Name:** MyINFINITI Expert (Second Delivery)
- Brand Support:** INFINITI ONLY (Nissan NOT supported)
- Appointment Type:** Virtual Appointments ONLY
- Duration:** 1-hour virtual meeting with INFINITI product and technology expert

Booking Flow Screens

Virtual appointment booking consists of 4 screens:

- Select Date and Time:** User selects date from calendar and available time slot
- Contact and Notes:** Auto-populated contact info (First Name, Last Name, Email, Phone Number) + optional special instructions field: "What vehicle features/functions would you like to learn more about? (Opt.)"
- Review:** Summary of appointment details (Date, Time, Contact Information) with BOOK VIRTUAL APPOINTMENT and CANCEL buttons
- Confirmation:** Appointment booked, eligibility updated to `SecondDeliveryEligibilityResponseAppointmentBooked`

Key Requirements

- Virtual-only appointments (no in-person or dealership options)
- INFINITI brand exclusively (Nissan excluded)
- API: `SecondDeliveryAppointmentsAtVirtual` called to fetch available time slots
- Contact information auto-populated from user profile (First Name, Last Name, Email, Phone)
- Special instructions optional (labeled: "What vehicle features/functions would you like to learn more about? (Opt.)")
- Review screen shows all appointment details with Edit options
- Successful booking returns appointment confirmation

Mock Data Reference

Time Slots Mock: `SecondDeliveryAppointmentsAtVirtual` response with available time slots

Booked Appointment Mock: `SecondDeliveryEligibilityResponseAppointmentBooked` with appointment status

Error States: No availability, invalid contact info, network failures

Critical Notes

- INFINITI brand only - test with Infiniti vehicles (QX80, Q60, etc.)
- Nissan vehicles should NOT access booking flow
- Virtual-only (no appointment type selection)
- Feature Flag: `EnableSecondDelivery` must be set to `true`
- After successful booking, eligibility query returns `AppointmentBooked` type
- Screen flow: Select Date and Time → Contact and Notes → Review → Confirmation

 Second Delivery - Manage Appointment (4)

Vehicle > Second Delivery

Second Delivery - Manage Appointment Test Cases

This folder contains test cases for managing existing Second Delivery appointments including Edit, Cancel, and Add to Calendar functionality.

Scope

- **Edit Appointment:** Modify date/time, contact information, and appointment notes
- **Cancel Appointment:** Cancel existing appointments with confirmation flow
- **Add to Calendar:** Add booked appointments to device calendar from Upcoming Appointment screen

Feature Context

- **Feature:** Second Delivery (MyINFINITI Expert)
- **Brand:** INFINITI only
- **Appointment Type:** Virtual appointments (1-hour)
- **Eligibility State:** SecondDeliveryEligibilityResponseAppointmentBooked
- **Feature Flag:** EnableSecondDelivery = true

      }
    }
  },
  "mode": "VIRTUAL"
}
```

APIs

- **SecondDeliveryAppointment:** Query to fetch existing appointment details
- **UpdateSecondDeliveryAppointment:** Mutation to update appointment details
- **CancelSecondDeliveryAppointment:** Mutation to cancel appointment

Testing Notes

- All test cases assume user has successfully booked an appointment
- Test cases validate both success and failure scenarios
- Platform-specific behaviors (iOS vs Android) are documented where applicable
- Date/time formatting follows pattern: [Day], [Month] [Date], [Year] @ [Time]
- Calendar integration requires device calendar permissions

 Parts and Accessories - NCI NIS and INF (5)

Support

- Only in NCI, we have a Parts and Accessories Card that shows under Support. NOTE: it also shows on Vehicle tab as an icon in line with Find a dealer, schedule service.
- When user taps on it, it takes you to a url which is taken from ContactUs.
- If user has a preferred dealer and that preferred dealer has a hashid associated with it (you will see this hashid in VehiclePreferredDealer), then that preferred dealer location will show on the webpage when you tap on Parts and Accessories card
- If there is a preferred dealer and no hashid or if there is no preferred dealer set, then the nearest Canadian dealer will show for either brands

KNOWN ISSUES:

- the url request that we send has the vin no. as well as partnerid(hashID) appended to it. But, sometimes, the webpage content will read that the vin is not recognized. Its a Nissan issue

When you replace an existing pref dealer (with hash id) with another one (with or without hash id), the location on the url doesn't change. We send the right coordinates in our url request, but the issue is on Nissan side.

Case	Priority	Automation	Configurations	Created by	Case ID	Created at	Estimate	Folder	Forecas
 Preferred Dealer with hash id	 Medium	 No		 User	 62245	 01/06/2026 11:00 am		 Parts and Accessories - NCI NIS and INF

 Enhanced In-App Chat (8)

Support

Purpose

Validates the Enhanced In-App Chat SDK migration from Legacy Salesforce Live Agent Chat to new Enhanced Chat SDK. Tests feature flag logic, SDK activation, payload routing, and UI display.

ClickUp documentation: <https://app.clickup.com/9014537789/v/dc/8cmxvhx-4714>

Feature Flag

`EnableEnhancedInAppChat`

- `true` → Enhanced Chat SDK (new UI)
- `false` → Legacy Chat SDK (old UI)

LiveChatHours Query

Returns `enhancedChat` flag indicating active SDK:

- `enhancedChat: true` → Enhanced Chat SDK
- `enhancedChat: false` → Legacy Chat SDK

Department Mapping:

- INFINITI: `InfinitiCAMobile, InfinitiConnectionMobile`
- Nissan: `NissanCAMobile, NissanConnectionMobile`

Salesforce Endpoint

URL: `nissanna.my.salesforce-scrct.com/iamessage/v1/conversation`

Payload includes:

- Routing attributes: email, first name, last name, zipcode, street, city, state, phone number, services
- Vehicle information: Owner vehicle information (VINs, year, model)
- Device information: OS version, device manufacturer, app name, app version
- Language: en-US

Validation Points

- Correct SDK active based on feature flag
- Department name, brand, device, account details in payload
- All routing attributes included in Salesforce payload
- Correct Salesforce endpoint delivery
- `enhancedChat` flag returned from LiveChatHours

Testing Notes

- All test cases should be validated on BOTH light mode and dark mode

Coverage

- Brands: Nissan NNA, INFINITI NNA
- Platforms: iOS, Android

 Edit Profile/Delete Account page using SSO - NNA NIS and INF only (2)

Settings

With Browser log in, the client wishes for the app to be able to go to Owner Portal pages (Nissan's customer self-serve portal) in a single sign on experience which doesn't need re-authentication
- Today, if you go to Edit profile, you will be asked to sign in again - Since the browser login shares the same auth, they want the app to be able to bypass

 Widgets (6)

What are widgets and its implementation in our apps: <https://app.clickup.com/9014537789/v/dc/8cmxvhx-5314/8cmxvhx-8434>

Summary Notes for testing

Widget sizes

- There are 2 standard widget sizes: small (square - 4 app buttons worth of space), medium (rectangular - 8 app buttons worth of space)
- Each size supports varying level of detail
 - small: displays a single piece of information (e.g. vehicle status)
 - medium: displays a combination of 2-3 pieces of information (e.g.battery status, functionality, time left to charge)

Scope

- Region: NNA, NCI
- Brand: MYN, MYI - MyNissan, MyInfiniti
- OS: iOS

Users

- iPhone MYN/MYI app users

- Once an app is installed, user can go to home screen of the device and follow the steps below:
- Navigation: Long hold home screen > tap Edit on top right corner of the screen > Tap Add Widget > Select MYN/ MYI
- Figma: <https://www.figma.com/design/2csAozBi9FaHwkTM5hUaCx/-Share--MyInfiniti-Widget-Design?node-id=342-2727&t=BJo14mqXvWVkbOdi-0>
- NOTE: the refresh interval of the widget is 30 mins. When testing, you may experience discrepancies between widget and app.
- WidgetDynamicData api is triggered when the widget is tapped on. This also is called only after 30 mins from the first time you tap on it
- Validate everything in Dark and Light Mode
- Validate in NCIFR
